Stewart Investors

About Stewart Investors

We are an active, long-only equity investment business with stewardship and sustainability at the heart of our investment philosophy and culture since 1988. As a team, we have been managing explicit sustainability portfolios since 2005.

Investment aim

To generate long-term, risk-adjusted returns for our clients by investing in the shares of high-quality companies that are particularly well positioned to contribute to, and benefit from, sustainable development.

Investment philosophy

- > **We are stewards.** Our role is to allocate society's capital to productive uses, in accordance with our [Hippocratic Oath](#).
- > **We are long term.** Our time horizon is measured in years, not weeks, and we value companies accordingly.
- > **We invest only in companies contributing to a more sustainable future.** We engage constructively as owners to help companies on their sustainability journeys.
- > **We invest only in high-quality companies.** We invest in companies with exceptional cultures, strong franchises and resilient financials.
- > **We believe capital preservation is important for capital growth.** We define risk as the possibility of the permanent loss of client capital.

This philosophy is proven across strategies and business cycles for nearly four decades.

What we mean by sustainability

Our process is deeply qualitative, based on fundamental, bottom-up research and analysis of the [sustainability](#) positioning of companies. We meet regularly with management teams, conduct site visits, and commission third-party research. Our assessment of company sustainability focuses on:

- 1 Sustainability positioning of products and services
- 2 Quality of management and treatment of all stakeholders
- 3 Operational performance and environmental and social impacts
- 4 Ability to navigate sustainability headwinds and tailwinds, such as changing regulations and consumer trends

Exclusions

We have a detailed [exclusions policy](#) explaining the sectors and sorts of companies we will never invest in.

Engagement

We invest time and energy in [engaging](#) and encouraging companies to improve their sustainability practices and product offerings.

Voting

We do not outsource voting decisions or any part of the engagement process; this is a core part of our role.

Visit our [website](#) to view [our position on harmful and controversial products and services](#), and our climate change statement.

Top 10 holdings - high conviction

We have a bottom-up approach and aim to invest only in well-stewarded, high-quality companies with sustainability at the heart of all investment considerations. Our portfolios are high conviction (top 10 holdings typically 30%-50%) and are completely benchmark agnostic.

Performance objective – capital protection and growth

Our investment philosophy focuses on delivering strong absolute returns over cycles. This focus means that we define risk as the loss of clients' capital rather than in terms of deviation from any benchmark index. As a result, our performance is likely to lag steeply rising markets, but deliver better results in falling markets. We believe this approach has served clients well over time and over cycles.

Investment style - downside protection
Composite outperformance since launch (AUD gross of fees)

Past performance is not a reliable indicator of future results. Investments in funds that make up the Composite may produce different performance returns to the Composite returns.

Source for composite performance: Stewart Investors as at 31 December 2024. Composite performance data is calculated on a total return basis and gross of tax. Performance figures do not reflect the deduction of investment fees and expenses. A client's return will be reduced by the effect of investment fees and expenses. If a client placed AUD100,000 under management and a hypothetical gross return of 10% was achieved, the investment assets before the effect of fees and expenses would have grown to AUD259,374 in 10 years. However, if fees and expenses to the value of 1% were incurred, investment assets would have grown to AUD234,573, or an annual compounded rate of 8.9%.
