Research Tender

Stewart Investors

Sustainability in Indian Chemicals Companies

Purpose: Identify the sustainability leaders and laggards in products and inputs in the chemicals sector in India.

Requirements: Research on the fifteen below-mentioned companies and brief (one page) summaries on the sustainability positioning of (i) the inputs to the chemicals produced and (ii) the end uses of the chemicals produced.

Detours to be avoided: A focus on operational sustainability and waste management; lots of detail on chemical compounds – the end-consumers of the research will be generalists.

Scope:

- > A focus on the products manufactured by the respective companies and their uses.
- > A focus on identifying clear leaders and laggards.
- > Identification of broad sustainability tailwinds, and which companies are best positioned to benefit.
- > Identification of long tail environmental and health risks, and which companies are most at risk.
- > Highlight any products that fall afoul of the highest global compliance standards on safety (typically EU REACH policies).

List of companies for focus:

Stewart Investors will provide a list of companies to examine.

Tender specifics:

Please submit a proposal by email (maximum of two pages) to siresearchtenders@stewartinvestors.com on how you would conduct this research, over what timeframe and for what price. In principle we support making your research report more widely available, however we reserve the right to prohibit, or place restrictions, on such circulation if we believe that is appropriate.

Closing date for application: Friday 10th June 2022.
