The principal activities of the Fund are to invest in accordance with the investment objectives and guidelines as set out in the current Product Disclosure Statement of the Fund and in accordance with the provisions of the Fund's Constitution.

The condensed financial statements of the Fund are for the half-year ended 31 December 2023. The condensed financial statements are presented in the Australian currency.

The condensed financial statements were authorised for issue by the directors of the Responsible Entity (the "Directors of the Responsible Entity") on 13 March 2024. The Directors of the Responsible Entity have the power to amend and reissue the condensed financial statements.

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these condensed financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated in the following text.

(a) Basis of preparation

These condensed financial statements have been prepared in accordance with Australian Accounting Standards AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*. Compliance with AASB 134 ensures compliance with International Financial Reporting Standards IAS 34 *Interim Financial Reporting*. The Fund is a for-profit entity for the purpose of preparing the condensed financial statements.

These condensed financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these condensed financial statements are to be read in conjunction with the annual financial statements for the year ended 30 June 2023 and any public announcements made in respect of the Fund during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The Condensed statement of financial position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. All balances are expected to be recovered or settled within twelve months, except for investments in financial assets and financial liabilities at fair value through profit or loss and net assets attributable to unitholders.

(b) Significant accounting policies

The accounting policies applied in these condensed financial statements are the same as those applied to the Fund's financial statements for the year ended 30 June 2023.

There are no other standards, interpretations or amendments to existing standards that are effective for the first time for the half-year beginning 1 July 2023 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

3 Rounding of amounts

The Fund is an entity of a kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* issued by the Australian Securities and Investments Commission (ASIC) relating to the "rounding off" of amounts in the condensed financial statements. Amounts in the condensed financial statements have been rounded to the nearest thousand dollars in accordance with that *ASIC Corporations Instrument*, unless otherwise indicated.

4 Comparative information

Comparative information has been revised where appropriate to enhance comparability. Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current period.

5 Fair value measurement

The Fund measures and recognises the following assets and liabilities at fair value on a recurring basis.

- Financial assets/liabilities at fair value through profit or loss (FVTPL) (see Notes 6 and 7)
- Derivative financial instruments

The Fund has no assets or liabilities measured at fair value on a non-recurring basis in the current reporting period.

AASB 13 *Fair Value Measurement* requires disclosure of fair value measurements by level of the following fair value hierarchy:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2); and
- inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

(i) Fair value in an active market (level 1)

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs.

The Fund values its investments in accordance with the accounting policies set out in Note 2 to the condensed financial statements. For the majority of investments, information provided by independent pricing services is relied upon for valuation of investments.

The quoted market price used to fair value financial assets and financial liabilities held by the Fund is the last-traded prices.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

(ii) Valuation techniques used to derive level 2 and level 3 fair value

The fair value of financial assets and liabilities that are not exchange-traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2. If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This may be the case for certain unlisted shares, certain corporate debt securities and managed funds with suspended applications and withdrawals.

Where discounted cash flow techniques are used, estimated future cash flows are based on the Investment Manager's best estimates and the discount rate used is a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the reporting period. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

5 Fair value measurement (continued)

(ii) Valuation techniques used to derive level 2 and level 3 fair value (continued)

Investments in other managed funds are recorded at the redemption value per unit as reported by the investment managers of such funds. The Fund may make adjustments to the redemption value based on considerations such as liquidity of the fund or its underlying investments, or any restrictions on redemptions and the basis of accounting.

Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions.

The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Fund holds. Valuations are therefore adjusted, where appropriate, to allow for additional factors including liquidity risk and counterparty risk.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Fund for similar financial instruments.

The determination of what constitutes 'observable' requires significant judgment by the Investment Manager. The Investment Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

Recognised fair value measurement

The following table presents the Fund's financial assets and liabilities measured and recognised at fair value as at 31 December 2023 and 30 June 2023.

As at 31 December 2023	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000

Equities securities	472,000	-	-	472,000
Total financial assets at fair value through profit or loss	472,000	-	-	472,000

(i) Transfers between levels

The Fund's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

There have been no transfers between levels in the fair value hierarchy for the period ended 31 December 2023.

5 Fair value measurement (continued)

Recognised fair value measurement (continued)

(ii) Fair value measurements using significant unobservable inputs (level 3)

The Fund did not hold any financial instruments with fair value measurements using significant unobservable inputs during the period ended 31 December 2023 or period ended 31 December 2022.

(iii) Valuation processes

Portfolio reviews are undertaken regularly by the Investment Manager to identify securities that potentially may not be actively traded or have stale security pricing. This process identifies securities which possibly could be regarded as being level 3 securities.

Further analysis, should it be required, is undertaken to determine the accounting significance of the identification. For certain security types, in selecting the most appropriate valuation model, the Investment Manager performs back testing and considers actual market transactions. Changes in allocation to or from level 3 are analysed at the end of each reporting period.

(iv) Fair values of other financial instruments

The Fund did not hold any financial instruments which were not measured at fair value in the Condensed statement of financial position. Due to their short-term nature, the carrying amounts of receivables and payables are assumed to approximate fair value.

8 Net assets attributable to unitholders

Under AASB 132 *Financial instruments: Presentation*, puttable financial instruments meet the definition of a financial liability to be classified as equity where certain strict criteria are met. The Fund has elected into the AMIT tax regime and consequently the Fund's Constitution has been amended. The Fund does not have a contractual obligation to pay distributions to unitholders. Therefore, the net assets attributable to unitholders of the Fund meet the criteria set out under AASB 132 and are classified as equity.

Movements in number of units and net assets attributable to unitholders during the period were as follows:

	31 December 2023 No.'000	31 December 2022 No.'000	Half-year ended 31 December 2023 \$'000	31 December 2022 \$'000

Total net assets attributable to unitholders			<u>477,183</u>	<u>439,425</u>

As stipulated within the Fund's Constitution, each unit represents a right to an individual share in the Fund and does not extend to a right to the underlying assets of the Fund. There are no separate classes of units and each unit has the same rights attaching to it as all other units of the Fund.

Capital risk management

The Fund classifies its net assets attributable to unitholders as equity. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Fund is subject to daily applications and redemptions at the discretion of unitholders.

Daily applications and redemptions are reviewed relative to the liquidity of the Fund's underlying assets by the Investment Manager. Under the terms of the Fund's Constitution, the Responsible Entity has the discretion to reject an application for units and to defer or adjust a redemption of units if the exercise of such discretion is in the best interests of the unitholders.

9 Distributions to unitholders

Distributions are payable semi-annually. Such distributions are determined by reference to the net taxable income of the Fund.

There were no distributions declared for the half-year ended 31 December 2023. The distributions for the period were payable after 31st December 2022 as follows:

	31 December 2023 \$'000	Half-year ended 31 December 2023 CPU*	31 December 2022 \$'000	31 December 2022 CPU*

There were no other significant events during the half-year.

12 Events occurring after the reporting period

Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Fund's financial position as at 31 December 2023 and of its performance for the half-year ended on that date and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
