

Stewart Investors Global Emerging Markets Sustainability Fund-Class R

30 June 2025 Monthly Factsheet

For Adviser use only

Investment strategy

The Fund aims to achieve its investment objective by investing in a diversified portfolio of equity or equity-related securities¹ of companies whose activities predominantly take place in emerging markets and are listed in, traded or dealt on any of the regulated markets worldwide.

Stewart Investors undertakes a bottom-up and qualitative approach to identifying, analysing and investing in companies, which it believes can deliver long-term positive financial returns and also contribute to, and benefit from, sustainable development. Stewart Investors considers a company contributes to, and benefits from, sustainable development if its activities lead to positive social outcomes and may lead to positive environmental outcomes.

The Fund does not hedge currency risk.

1. The Fund may have exposure to 'Equity-related securities' if it is entitled to such securities via a corporate action.

Investment objective

To achieve long-term capital appreciation by investing in companies which contribute to, and benefit from, sustainable development.

The Fund aims to exceed the MSCI Emerging Markets Index (before fees and taxes) over rolling five-year periods.

The Fund is actively managed and the benchmark is not used to limit or constrain how the Fund's portfolio is constructed.

Product overview

Country breakdown

Sector breakdown

Data source: First Sentier Investors 2025

Data as at: 30 June 2025

Any apparent discrepancies in the numbers are due to rounding. Performance returns are calculated net of management fees and transaction costs and do not reflect brokerage that investors incur when buying and selling units on the ASX. Performance returns for periods greater than one year are annualised. Past performance is not a reliable indicator of future performance.

Any apparent discrepancies in the numbers are due to rounding.

Portfolio Beta measures the portfolio's sensitivity to benchmark movements. Mathematically, it is the covariance of the portfolio vs the benchmark divided by the variance of the benchmark. **Turnover** is the average of sales and purchases divided by the average portfolio size. **Cashflow Adjusted Turnover** is the same as above, except that the lesser of sales and purchases is used in place of the average of the two. This is to adjust for turnover that is related to investing inflows or selling stocks to meet outflows rather than related to active management of the portfolio.
